Chennai / Bangalore, India

SKILLS

AI Development

Python, Scikit-Learn, Pandas, NumPy, Prompt Engineering

AI Agents & LLM

LangChain, OpenAI API, AI Agent Workflows, Automation

Web & Backend

React.js, Next.js, Prisma ORM, Supabase, REST APIs

Cloud & Tools

AWS (SNS), Git/GitHub, VS Code, Postman

EDUCATION

Master of Computer Application
SRM Institute of Science and Technology
2024 - 2026

Bachelor of Computer Application
Patrician College of Art and Science
2021 - 2024

HSC (12th Grade)
DVS Reddy Hr Sec School
2020

SSLC (10th Grade)
DVS Reddy Hr Sec School
2018

CERTIFICATIONS

- Build Your Own Static Website - HTML, CSS, Bootstrap
- Website Development using WordPress
- Hackathon Participation Certificate

LANGUAGES

Tamil (Native), English (Fluent), Telugu (Spoken)

Artificial Intelligence Developer experienced in building AI-agent-powered features and machine-learning workflows (Scikit-Learn, Pandas, NumPy), combined with production full-stack delivery experience (GoJobSync).

WORK EXPERIENCE

Application Developer

Thejobsync, Chennai | Jul 2026 - Present

- Independently designed, built and deployed www.gojobsync.com, a recurring end-to-end recruitment/job-sync platform, owning the project full stack from architecture to production deployment.
- Built the frontend with React.js, Next.js and TypeScript, delivering a fast, type-safe and fully responsive UI.
- Modeled the database schema with Prisma ORM and integrated Supabase for data storage, authentication and real-time API connections.
- Implemented recurring notification workflows using AWS SNS for automated alerts and updates.
- Designed and built an internal CRM to manage campus recruitment drives, candidate pipelines and placement coordination.
- Deployed and maintained the platform on AWS, ensuring scalability and reliability.
- Applied AI agents and prompt engineering to accelerate feature development, automate repetitive engineering workflows, and support data-driven decision making on the platform.

Frontend Developer Intern

Willo Web Studio, Chennai | Nov 2025 - Feb 2026

- Developed responsive web applications using React.js and Next.js.
- Built reusable UI components and integrated REST APIs for seamless UX.

Website Development Intern

Object Automation System Solution, Chennai | Aug 2023

- Built responsive business websites using WordPress CMS with custom themes and plugins.
- Integrated graphic design assets and optimised site performance for clients.

PROJECTS

GoJobSync - Recurring Recruitment Platform (www.gojobsync.com)

- Full-stack platform built solo with React.js, Next.js, TypeScript, Prisma and Supabase.
- Integrated AWS SNS for recurring notifications and an internal CRM for recruitment tracking.
- Used AI agents and prompt engineering (LangChain, OpenAI API) to automate development workflows and rapidly prototype features.

News Reader Application (Personal Project)

- Built a responsive Android news app with category-based filtering and real-time headlines via News API.
- Implemented tab navigation, pull-to-refresh, offline bookmarking, lazy loading and image caching.

Smart Voting System (Academic Project)

- Developed a secure digital voting platform with JWT authentication and role-based access control.
- Built an admin dashboard with live result tracking and optimised MySQL queries.

ACHIEVEMENTS

- 3rd place - JEPPIAAR COMBUST Science Project Expo (Nov 2019)
- Attended 3-day International Workshop on Skill Enhancement, Ethiraj College (Feb 2024)
